Summary

I am at the final stage of academic study of Computer Science Undergraduate level with strong belief in principles of software engineering and ability to solve problems through review. Interested to apply my theoretical knowledge practically through upcoming internship. With over a year of personal experience with the MERN stack, I am constantly trying to learn new frameworks and programming languages. I am passionate about coding and taking on new challenges. And I am excited to contribute to the opening projects and advance my skills in a dynamic environment.

Education

Independent University, Bangladesh

Bachelor of Science in Computer Science and Engineering (present)

Bashundhara R/A,

Dhaka-1229

January 2020 - Current

- CGPA: 3.38/4.0 (present)

[Academic Transcript](#)

Soft Skills Communication, Leadership, Problem-Solving, TeamWork.

Projects

Fullstack Todo Management System

28 April - 08 May 2024

- I created this project thinking about the progress of the user's work with all types of user data storage, real time updates, notifications. Where the user will first register with all his information and all the values of the registration will be stored in the database. Then if the registration is successful then he can login. Skills: Front-end used- Next.js, React.js, JavaScript, Html, Css And Backend used- Node.js, Express.js And Database used MongoDB.

Career Highlights

11 May - 15 May 2024

- Throughout my career I have achieved significant milestones and exceptional skills across various projects and roles. I made my portfolio with all these. Where all my basic information and CV will be there and the user can contract with me if he wants. And all user information will be stored in my database. Besides, there will be my current project and previous project. I will have skills, and education background. Skills: Front-end used- Next.js, React.js, JavaScript, Html, Css And Backend used- Node.js, Express.js And Database used MongoDB.

LankaBangla Finance PLC

July 23 - September 2023

- Customer will give all his information to CRM then CRM will send that information to Head of Settlement. He will verify this information and verify all information through Bank Statement, NBR, Election Commission regarding CRM. BO will create accounts and give them to the customer. Skills: Frontend uses React.js, Html and Css and Backend uses Node.js, express.js and Database uses MySQL.
